India's economy, in particular, has thrived amidst these pressures. With the Government's focus on expanding airports to 240 by 2030 & airlines and cargo operators expanding capacity through new hubs, freighter fleets, this move will drive significant growth in the logistics sector. Furthermore, the Airports Authority of India's planned capital expenditure of Rs 30,000 crore over five years and the government's target of operationalizing 1,000 UDAN routes will further boost the expansion of logistics into new territories. This proactive approach, combined with our efforts, has led to year-on-year turnover growth. Our FY25 EBITA margins improved over FY24, and our PAT saw substantial growth.”*
